

# Community Partner Evaluation

NOVEMBER 2017

## Part 2 of 2 - Recommendations Arising from Evaluation Results

### Youth Wellness HUB

**Point In Time and Haliburton Highlands Health Services are leading this new initiative to support youth in developing a collaborative, multi-use space.**

**The Hub will be a one-stop-shop for recreation, support, and gathering with peers. For more information or to get involved in the HUB email [haliburtonhub@pointintime.ca](mailto:haliburtonhub@pointintime.ca).**

### Quick Access

Our Quick Access clinic that started in September 2017 served 160 clients (Sept 2017-Mar 2018). Of these clients, 51% were referred to Point in Time services, the rest got what they needed for now in one session.

This service has proven to be effective in reducing wait lists and allowing clients to access service quickly when they need it!

### Staff Development

**We are committed to ensuring our staff receive the training they need to be able to best serve clients. All of our family support, clinical and youth justice workers were trained in Cognitive Behavioural Therapy in June 2018.**

**We heard you when you said communication could be improved!**

Our very first quarterly e-blast was sent out on July 11, 2018. E-blasts will be sent out regularly to update Community Partners on programming, new services, upcoming events and more!

**Strategic Planning**  
**11% of respondents said they would like to be involved in our Strategic and Organizational Planning process. Partners will be informed via e-blast when this takes place.**

If you did not receive our July 11th e-blast or know of another Community Partner who should be on our list, email [info@pointintime.ca](mailto:info@pointintime.ca)
