

# Community Partner Evaluation

NOVEMBER 2019

## Recommendations Arising from Evaluation Results

### Youth Wellness Hub

Point in Time and Haliburton Highlands Health Services together with many supportive community agencies and community members have spearheaded the development of the Youth Wellness Hub.

Serving ages 12-25, the hub offers drop-in programming, mental health and addictions, physical and sexual health, trans-positive care and employment supports. The hub also supports needs such as food, clothing and transportation. During the COVID-19 pandemic, we are offering face to face as well as virtual services and are continuing to offer our usual supports in adapted ways.

For more information or to get involved with the hub, call/text 705-306-5199 or email [haliburtonhub@pointintime.ca](mailto:haliburtonhub@pointintime.ca).

### Quick Access Clinic

Our Quick Access clinic has served over 550 clients since it started in September 2017.

This service has proven to be effective in reducing wait lists and allowing clients to access service quickly when they need it! Some clients only need one session and leave feeling like they have the skills they need to help them, while others may be referred to other programs internally or externally as needed.

During COVID-19 these supports continue to be offered in person or virtually.

## Communication is key!

Our first quarterly e-blast was sent in July, 2018. E-blasts have been sent out regularly to update Community Partners on programming, new services, upcoming events and more!

If you have not been receiving our e-blast or know of another Community Partner who should be on our list, email [info@pointintime.ca](mailto:info@pointintime.ca)

## External Collaborations

We are committed to ensuring our agency is consistent and collaborative with community partners. We have made efforts this year to work with a number of our partnering agencies in ensuring that we understand each other's service models and referral processes.
