

QUICK ACCESS EVALUATION

The Quick Access Clinic was initiated in 2017 in response to client feedback about the length of time they waited for service. It provides quick access (usually within 1-2 weeks) to confidential support and is also the main gateway into other services at Point in Time.

186

individuals accessed the quick access clinic this year.

37%

of quick access sessions resulted in clients getting the support they needed in one session.

93%

of youth and parents attending quick access sessions rated the session positively.

78%

of children attending quick access sessions rated the session positively.

88%

of children attending sessions were considered "clinically distressed" based on Outcome Rating Scales

68%

of quick access sessions occurred at our Haliburton office. Sessions are also offered in our Minden office or at client homes or schools.
